RECOMMENDATIONS FOR THE VIDEO RECORDING

The impression of your performance will largely depend on the quality of video, there are some advices:

1. Do not use the digital zoom. Better to put a device for video recording at a **short** distance.
2. If you're making video on a mobile device (phone, tablet ...), then you should place it only in horizontal position.
3. Recommended to place a device for video recording on a tripod to avoid blurry images.
4. Try to avoid unwanted noise during recording (the sounds behind the scenes, and etc.)
5. Do not put the artist in front of a bright light source (such as a window).
6. Do not use optical effects (sepia, fast shooting, b / w photo, etc.)
7. Camera has to be directed to the artist, it must be on the foreground of the image.
8. Do not edit your video and do not make it from several pieces of videos.
9. Is allowed to use an external microphone (wireless microphone, stereo microphone..).

If your original video does not comply with the format, the size of the video file, you can use free software to convert video recordings in Internet.

Here are some examples of high-quality video recordings:
